PROFESSIONAL SUMMARY

Cloud & DevOps professional with a Computer Science Engineering background and hands-on experience in AWS, Linux System Administration, Docker, CI/CD, and Terraform. Experienced in deploying and managing production workloads including Ethereum node infrastructure, Magento web stacks, Dockerized applications, and AWS infrastructure using Infrastructure as Code (IaC). Brings 4+ years of overall professional IT experience, with strong troubleshooting, systems administration, client communication, and production support capabilities. Currently also working as a contract Warehouse Associate in a fast-paced fulfillment environment.

TECHNICAL SKILLS

Cloud (AWS)	EC2, VPC, IAM, S3, Security Groups, Internet Gateway, CloudWatch(basics), AWS resource provisioning
Linux Admin	Debian/Ubuntu, Systemd, Process Management, Cron Jobs, Storage/Memory Monitoring, Log Analysis (journalctl, /var/log), SSH/SCP, File Permissions.
Containers	Docker, Docker Compose, Container Lifecycle, Volumes, Container Networking (Basics of K8, Prometheus & Grafana).
CI/CD & IaC	Git & GitHub, GitHub Secrets, GitHub Actions, CI/CD Pipeline Automation, Terraform (Basic Infrastructure provisioning).
Networking	Nginx, reverse proxy, virtual hosting, SSL (Let's Encrypt), DNS, Cloudflare, Ethereum RPC, HTTP/HTTPS, TCP/IP, firewall basics
Web-App Stack	Magento 2, Nginx, Varnish Cache, Redis, Elasticsearch, PHP-FPM, phpMyAdmin, MySQL 8.

PROJECTS

Ethereum Node Infrastructure DevOps (Production Infrastructure - Confidential Client Project) ([GitHub](#))

- Deployed and provisioned an Ubuntu-based Latitude.sh bare metal server for Ethereum node infrastructure.
- Installed, configured, and synchronized Geth (Execution Client) and Lighthouse (Consensus Client) for Ethereum Mainnet.
- Built and managed containerized services using Docker Compose.
- Configured Nginx reverse proxy and secured Ethereum RPC endpoints using Let's Encrypt SSL (Certbot).
- Optimized node synchronization, server performance, and overall system health for reliable production operation.
- Diagnosed and resolved Google Safe Browsing issues affecting production accessibility.
- Performed Linux system administration, log analysis, and production troubleshooting.

Magento Production Stack Deployment (AWS + Linux) ([GitHub](#))

- Built and deployed a full production-grade Magento hosting environment on AWS EC2 (Debian 12).
- Configured NGINX as reverse proxy with PHP-FPM backend & MySQL 8 database.
- Implemented Redis for session handling and Varnish for full-page caching to improve performance.
- Integrated Elasticsearch for product search functionality.
- Managed SSL configuration (self-signed / HTTPS setup) and virtual hosting.
- Performed system tuning, log monitoring & troubleshooting for high availability.

CI/CD Pipeline Automation (GitHub Actions) ([GitHub](#))

- Designed CI/CD pipeline using GitHub Actions for automated build and deployment.
- Configured YAML-based workflow to trigger deployment on code push.
- Automated SSH-based deployment to AWS EC2 instance.
- Secured credentials using GitHub Secrets.
- Reduced manual deployment effort and improved release consistency.

Infrastructure as Code (Terraform - AWS) ([GitHub](#)) ([Application](#))

- Provisioned AWS infrastructure using Terraform scripts.
- Created EC2 instances, VPC, Subnets, Security Groups, and IAM roles.
- Implemented reusable infrastructure modules for scalable deployment.

PROFESSIONAL EXPERIENCE

Warehouse Associate – 2 Months Contract

5 Sep 2026 - 31 Oct 2026

Avsar HR SPNN Business Services Pvt Ltd — Deployed at Amazon CJB1

- Currently working in Stowing operations within a fast-paced Amazon fulfillment environment.
- Perform assigned stowing activities while following standard operating procedures, safety and quality requirements.
- Work with team members and supervisors to complete assigned tasks accurately and within expected timelines.

Career Transition / Hands-on Projects

Mar 2026 - Present

DevOps & Cloud Engineering

- Building and deploying mid-to-high level production environments (Magento, automated CI/CD pipelines, Provisioned AWS infrastructure using Terraform.).
- Deployed Dockerized applications on AWS EC2.
- Deployed and managed production Linux infrastructure including Ethereum node environments, Dockerized applications, Nginx reverse proxy, SSL, Cloudflare, and AWS workloads.
- Published multiple projects on GitHub.

DevOps & Cloud Engineering Intern

May 25, 2026 – Jul 5, 2026

WeAlwin Technologies

- Gained hands-on exposure to AWS IAM, S3, and VPC fundamentals in a live project environment.
- Managed GitLab organization users, roles, and permissions based on project requirements.
- Configured Cloudflare domains and DNS records, including A and CNAME records.
- Gained practical exposure to Cloudflare WAF, bot protection, bot attack mitigation, and IP blocking.
- Studied live project architectures to understand application components, infrastructure flow, DNS, security, and cloud deployment relationships.

Senior Business Development Executive

Dec 2024 - Mar 2026

Plurance Technologies Pvt Ltd

- Managed B2B client relationships for software and IT services.
- Trained and mentored 4+ junior team members while supporting day-to-day team coordination.
- Coordinated with internal teams throughout the sales and delivery lifecycle.
- Maintained project documentation and client communication.
- Built long-term customer relationships through effective communication.

Professional Development

May 2024 - Nov 2024

MBA Final Semester and Academic Project

- Completed MBA final semester examinations.
- Successfully completed MBA academic project.
- Strengthened analytical, business, and project management skills.

Senior Business Development Executive

Jul 2023 - May 2024

Clarisco Solutions

- Managed B2B client relationships for software development services.
- Gathered client requirements and prepared business proposals.
- Coordinated project communication between clients and internal teams.
- Maintained documentation throughout the project lifecycle.

Business Development Executive

Mar 2022 - Jul 2023

WeAlwin Technologies

- Generated business opportunities for software development services.
- Conducted client meetings and requirement discussions.
- Prepared quotations and business proposals.
- Coordinated with internal teams during project execution.

EDUCATION

M.B.A (Business Administration)

Jun 2022 – Nov 2024

Madurai Kamaraj University

B.E (Computer Science & Engineering)

Aug 2016 – Dec 2020

Sethu Institute of Technology

CERTIFICATIONS

- AWS Cloud Practitioner Essentials
- Linux System Administration

Availability: Available to join from 01 Nov 2026 — Open to Relocation / Remote / Hybrid — Available for 24x7 Shift-Based Roles
