PROFESSIONAL SUMMARY

Computer Science Engineering graduate with 2+ years of professional experience in client-facing IT environments and strong hands-on experience in Linux system administration, AWS cloud infrastructure, and DevOps tools through real-world projects. Proficient in designing and managing cloud-hosted Linux environments on AWS EC2, automating infrastructure using Terraform and Bash scripting, and implementing CI/CD pipelines using GitHub Actions and Docker-based deployments. Experienced in server provisioning, application deployment, Nginx configuration, SSL setup, DNS management, system troubleshooting, and production-level issue analysis. Strong exposure to cloud support operations, infrastructure monitoring, log analysis, and cross-team collaboration with engineering teams. Seeking opportunities as Linux System Administrator, Cloud Support Engineer, Infrastructure Support Engineer, AWS Support Engineer, Technical Support Engineer, or Junior DevOps Engineer.

TECHNICAL SKILLS

Cloud (AWS)	EC2, IAM, VPC, S3, Security Groups, Internet Gateway, CloudWatch (basics), AWS resource provisioning
Linux Admin	Ubuntu, systemd, cron jobs, SSH, SCP, file permissions, process management, log analysis (journalctl), disk & memory monitoring
DevOps & IaC	Git, GitHub, GitHub Actions, CI/CD pipelines, Terraform (basic), Infrastructure as Code (IaC), Bash scripting
Containers	Docker, Docker Compose, container lifecycle management, networking, volumes
Networking	Nginx, reverse proxy, virtual hosting, SSL (Let's Encrypt), DNS, Cloudflare, HTTP/HTTPS, TCP/IP, firewall basics
Monitoring	System monitoring, log analysis, incident troubleshooting (basic), production issue debugging, server health monitoring

PROJECTS

CI/CD Pipeline using GitHub Actions + AWS + Docker ([GitHub](#))

- Built a complete automated CI/CD pipeline which reduced 15 minutes of manual work for application deployment
- Automated Docker image build and deployment workflow
- Configured secure deployment using GitHub Secrets and SSH Deployed applications on AWS EC2 instances
- Handled pipeline failures, debugging, and deployment issues Implemented zero-downtime container replacement strategy

Infrastructure Automation using Terraform (AWS) ([GitHub](#))

- Provisioned AWS infrastructure using Terraform scripts
- Created EC2 instances, VPC, subnets, and security groups
- Managed infrastructure lifecycle using Terraform workflow (init, plan, apply, destroy)
- Practiced Infrastructure as Code (IaC) for cloud automation

Linux Server Deployment & Application Hosting ([GitHub](#)) ([Application](#))

- Configured Ubuntu server on AWS EC2 for application hosting
- Installed and configured Nginx reverse proxy
- Implemented SSL using Let's Encrypt (HTTPS security)
- Managed DNS routing using Cloudflare
- Performed system-level troubleshooting for server issues

Docker Infrastructure Lab ([GitHub](#))

- Built and managed containerized environments using Docker
- Handled container networking, volumes, and lifecycle management
- Troubleshoot container runtime and deployment issues
- Simulated multi-container application environments

Linux Monitoring & Automation ([GitHub](#))

- Developed Bash scripts for system monitoring (CPU, memory, disk)
- Configured cron jobs for automated system tasks
- Performed log analysis using system logs (journalctl, /var/log)

- Managed Linux services using systemd

PROFESSIONAL EXPERIENCE

Senior Business Development Executive

Clarisco Solutions

Jul 2023 - May 2024

- Worked closely with engineering teams during solution planning and client delivery
- Assisted in technical requirement gathering and system analysis discussions
- Coordinated between clients and technical teams for issue resolution
- Contributed to technical documentation and workflow improvement discussions

Business Development Executive

WeAlwin Technologies

Mar 2022 - Jul 2023

- Managed client communication for IT and software projects.
- Collaborated with development teams for requirement understanding
- Assisted in preparing technical proposals and solution documentation
- Supported project coordination and delivery tracking

EDUCATION

Master Of Business Administration (MBA)

Madurai Kamaraj University

2022 – 2024

Bachelor of Engineering (Computer Science & Engineering)

Sethu Institute of Technology

2016 – 2020

CERTIFICATIONS

- DevOps Bootcamp
- Linux Administration Fundamentals
- AWS Cloud Essentials

CORE STRENGTHS & ADDITIONAL INFORMATION

Linux System Administration • AWS Cloud Infrastructure • CI/CD Pipelines • Infrastructure Automation • Docker Containerization • Server Deployment • Production Troubleshooting • Cloud Support Operations • Technical Documentation • Problem Solving • Cross-team Collaboration • Fast Learning Ability

Availability: Immediate Joiner, Open to Relocation, Available for 24x7 Shift-Based Role
